DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of 1-29 in Paper No. 6 is acknowledged.
2. Claims 30-41 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.
3. Claims 30-41 have been canceled.
4. **Claims 1-29 are presented for examination.**

Specification

5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
6. The title of the invention is not descriptive. **A new title is required that is clearly indicative of the invention to which the claims are directed.**

Double Patenting

7. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

8. Claims 1-29 provisionally rejected under the judicially created doctrine of double patenting over claims 1-72 of copending Application No. 09/874,898. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows:

In claims 1-13 of 09/874,898 revealing "a operational mode". The operation mode including "test mode". Therefore, claims 1-13 of 09/874,898 overcomes claims 1-7 and 21-25 in application.

In claims 21-24 of 09/874,898 revealing "an active mode". The active mode including "test mode". Therefore, claims 21-24 of 09/874,898 overcomes claims 14-18, 26-29 in application.

In claims 30-31 of 09/874,898 disclosed all elements in claims 19-20.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
